PROFESSIONAL SUMMARY

Computer Systems Engineer and Frontend Developer focused on creating responsive, visually consistent, and user-centered web experiences. Skilled in HTML, CSS, JavaScript, Bootstrap, Git/GitHub, and collaborative product development, with experience contributing to MVP planning, user flows, UI structure, documentation, and frontend implementation. Brings a background in operations, customer support, and HR, strengthening communication, organization, analytical thinking, and problem-solving.

TECH STACK

HTML5 | CSS3 | JavaScript | Bootstrap | Git | GitHub | VS Code | Vercel | Figma | Jira | UX/UI Design | Product Thinking | Agile/Scrum

SOFT SKILLS

Problem-solving | Attention to detail | Communication | Teamwork | Organization | Adaptability | Leadership | Empathy | Analytical thinking | Continuous learning | Product mindset

PROJECTS

Caliope – Reader & Writer Platform MVP

Bootcamp team project | Frontend, UX/Product Thinking & Documentation - May 2026 – Jul 2026

Collaborative MVP developed during a Full-Stack Java Developer bootcamp. Caliope is a digital platform designed to connect readers and writers through story publishing, reading, reviews, and personal libraries.

Main contributions:

- Proposed and helped define the initial product concept, adapting it into a realistic MVP for an 8-week bootcamp timeline.
- Contributed to product planning, user flows, navigation structure, and feature prioritization.
- Designed and documented the project's visual identity, including color palette, typography direction, layout references, and UI consistency guidelines.
- Built and refined multiple frontend screens using HTML, CSS, Bootstrap, and Bootstrap Icons.
- Worked on key interface sections such as Home, Explore, Profile, Library, Writing, Reading, Review Modal, About, and Contact pages.
- Created reusable CSS structures and helped maintain consistency across layouts, navigation, top bar, sidebar, cards, buttons, modals, and footer.
- Participated in Agile/Scrum ceremonies, backlog organization, sprint planning, team documentation, and project coordination.
- Collaborated on technical documentation, including design system, architecture notes, database/API planning, user flows, and project roadmap.

Technologies: HTML5 | CSS3 | Bootstrap | Bootstrap Icons | JavaScript | Git | GitHub | Jira

JavaSport – Sportswear E-commerce Landing Page

Hackathon team project - Jun 2026

Sportswear e-commerce landing page developed during a hackathon, focused on creating a functional and visually consistent online shopping experience under a short delivery timeframe.

Main contributions:

- Contributed to the CSS architecture and visual consistency of the project.
- Organized stylesheet connections and global styles.
- Helped define the project's color palette, typography system, buttons, and reusable visual elements.
- Collaborated with the team to deliver a functional project in less than 24 hours.

Technologies: HTML5 | CSS3 | Bootstrap | JavaScript | Git | GitHub

Personal Portfolio Website

Codedex CSS Final Project - Jun 2026

Personal portfolio website created to present professional profile, projects, certifications, skills, and contact information with a frontend-oriented visual identity.

Main contributions:

- Built a responsive personal website using HTML and CSS.
- Structured sections for hero, about, projects, certifications, skills, tools, and contact.
- Added project cards, a downloadable CV button, navigation back-to-top button, footer repository link, and soft skill tags.
- Focused on visual consistency, spacing, hierarchy, and personal branding for frontend and UX-oriented roles.

Technologies: HTML5 | CSS3 | Git | GitHub | Vercel

Clío Journal — Personal Reading & Writing Product Concept

Personal project | Frontend, UX/UI & Product Design - 2026 (Ongoing)

Personal web product concept focused on creating a cozy, user-centered digital space for readers and writers. The project explores reading tracking, personal libraries, creative writing tools, reviews, notes, and a soft editorial visual identity.

Main contributions:

- Defined the product vision, target users, core features, and emotional experience of the platform.
- Created the visual direction, including pastel color palette, typography, UI mood, dark mode references, and interface style.
- Designed landing page sections such as hero, product explanation, reading experience, creator section, contact, and footer.
- Built the landing page structure using semantic HTML and custom CSS.
- Worked on responsive layout decisions, visual hierarchy, image previews, cards, CTAs, and consistent spacing.
- Applied UX and product thinking to differentiate the project from a standard reading tracker by focusing on habit, creativity, and emotional connection.

Technologies: HTML5 | CSS3 | Responsive Design | UI Design | Product Thinking

PROFESSIONAL EXPERIENCE

Call Center Ops Supervisor | TP

Apr 2025- Aug 2025

- Analyzed operational data (AHT, CSAT, call volume, resolution trends) using analytical and problem-solving skills.
- Organized raw data into structured reports with accuracy and attention to detail.
- Identified patterns and inefficiencies to support process improvements through logical analysis.
- Communicated data insights clearly to stakeholders and team members, strengthening collaboration skills.
- Monitored performance metrics and maintained documentation to ensure organization and continuous improvement.

Bilingual Reservations Support Representative | TP

Jun 2024 - Apr 2025

- Handled around 30 customer requests daily via calls, chats, and email in a fast-paced bilingual environment.
- Supported customers across Latin America and Spain, improving communication and adaptability skills.
- Used problem-solving skills while following established processes and procedures.
- Created simple scripts and explanations to improve customer understanding and communication.
- Provided empathetic and solution-focused support, maintaining organization and attention to detail in high-volume work.

HR Delivery Associate | Conduent

May 2022 - Feb 2024

- Managed follow-up processes for selected candidates, ensuring document collection and completion.
- Organized and reviewed documents before submitting them to HR, with strong attention to detail.
- Answered candidate questions during onboarding, using communication and problem-solving skills.
- Acted as a link between candidates and HR to support process coordination.
- Created and maintained an Excel tracking system to monitor candidate progress and improve organization.
